## NIPPON COLUMBIA CO., LTD.

IMPORTANT TO SAFETY

**WARNING:**  
TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

**CAUTION:**

- Handle the power supply cord carefully.  
Do not damage or deform the power supply cord. If it is damaged or deformed, it may cause electric shock or malfunction when used. When removing from wall outlet, be sure to remove by holding the plug attachment and not by pulling the cord.
- Do not open the top cover.  
In order to prevent electric shock, do not open the top cover.  
If problems occur, contact your DFNON dealer.
- Do not place anything inside.  
Do not place metal objects or spill liquid inside the CD player.  
Electric shock or malfunction may result.

Please record and retain the Model name and serial number of your set shown on the rating label.

Model No. DN-2500F      Serial No. \_\_\_\_\_

**CAUTION**  
RISK OF ELECTRIC SHOCK  
DO NOT OPEN

**CAUTION**  
TO REDUCE THE RISK OF ELECTRIC SHOCK,  
DO NOT REMOVE COVER (OR BACK). NO USER SERVICE-  
ABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED  
SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

• FOR U.S.A. & CANADA MODEL ONLY

**CAUTION**

TO PREVENT ELECTRIC SHOCK, DO NOT USE THIS (POLARIZED) PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

• POUR LES MODELES AMERICAINS ET CANADIENS UNIQUEMENT

**ATTENTION**

POUR PREVENIR LES CHOCs ELECTRIQUES NE PAS UTILISER CETTE FICHE POLARISEE AVEC UN PROLONGATEUR UNE PRISE DE COURANT OU UNE AUTRE SORTIE DE COURANT SAUF SI LES LAMES PEUVENT ETRE INSEREES A FOND SANS EN LASSER AUCUNE PARTIE A DECOUVERT.

**NOTE:**  
This CD player uses the semiconductor laser. To allow you to enjoy music at a stable operation, it is recommended to use this in a room of 5°C (41°F) - 35°C (95°F).

LABELS (for U.S.A. model only)

**CERTIFICATION**

THIS PRODUCT COMPLIES WITH DHS RULES 71CFR SUBCHAPTER J APPLICABLE AT DATE OF MANUFACTURE

**CAUTION:**  
USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

**THE COMPACT DISC PLAYER SHOULD NOT BE ADJUSTED OR REPAIRED BY ANYONE EXCEPT PROPERLY QUALIFIED SERVICE PERSONNEL.**

**NOTE:**  
This unit may cause interference to radio and television reception if you do not operate it in strict accordance with the following instructions. This unit complies with Class B computing device rules in accordance with the FCC Part 15.27. Some of the following instructions may be required to reduce the risk of such interference in a residential installation. If the unit does cause interference to any radio or television reception, try to reduce it by one or more of the following means:

- Turn the other unit to improve reception
- Move this unit
- Move this unit away from others
- Plug this unit respectively into a different AC outlet

• This is in accordance with Section 15.838 of the FCC Rules.

**CLASS 1 LASER PRODUCT**

SAFETY INSTRUCTIONS

- Read Instructions - All the safety and operating instructions should be read before the appliance is operated.
- Retain Instructions - The safety and operating instructions should be retained for future reference.
- Head Warnings - All warnings on the appliance and in the operating instructions should be adhered to.
- Follow Instructions - All operating and use instructions should be followed.
- Water and Moisture - The appliance should not be used near water - for example, near a bathtub, washbowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool, and the like.
- Carts and Stands - The appliance should be used only with a cart or stand that is recommended by the manufacturer.
- An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.
- Wall or Ceiling Mounting - The appliance should be mounted to a wall or ceiling only as recommended by the manufacturer.
- Ventilation - The appliance should be situated so that its location or position does not interfere with its proper ventilation. For example, the appliance should not be situated on a bed, sofa, rug, or similar surface that may block the ventilation openings; or, placed in a built-in installation, such as a bookcase or cabinet that may impede the flow of air through the ventilation openings.
- Heat - The appliance should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.
- Power Sources - The appliance should be connected to a power supply only of the type described in the operating instructions or as marked on the appliance.
- Grounding or Polarization - Precautions should be taken so that the grounding or polarization means of an appliance is not defeated.
- Cleaning - The appliance should be cleaned only as recommended by the manufacturer.
- Power Lines - An outdoor antenna should be located away from power lines.
- Outdoor Antenna Grounding - If an outside antenna is connected to the receiver, be sure the antenna system is grounded so as to provide some protection against voltage surges and built-up static charges. Article 810 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna-discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure A.
- Nonuse Periods - The power cord of the appliance should be unplugged from the outlet when left unused for a long period of time.
- Object and Liquid Entry - Care should be taken so that objects do not fall and liquids are not spilled into the enclosure through openings.
- Damage Requiring Service - The appliance should be serviced by qualified service personnel when:
  - The power-supply cord or the plug has been damaged, or
  - Objects have fallen, or liquid has been spilled into the appliance, or
  - The appliance has been exposed to rain, or
  - The appliance does not appear to operate normally or exhibits a marked change in performance, or
  - The appliance has been dropped, or the enclosure damaged.
- Servicing - The user should not attempt to service the appliance beyond that described in the operating instructions. All other servicing should be referred to qualified service personnel.

**MAIN FEATURES**

The DN-2500F is a double CD player which incorporates all of the popular functions from the DN-2000FMKII and adds additional features for more advanced DJ mixing and remixing.

- (1) The DN-2500F can be easily mounted on a standard 19-inch rack
- (2) The player unit and control unit are connected by a single cord, providing installation freedom
- (3) Playback begins immediately when the PLAY button is pressed (Instant Start)
- (4) Pitch is adjustable using a long-throw slider, providing an analog feel
- (5) The pitch can be changed temporarily based on the already adjusted pitch (Pitch Bend)
- (6) The point at which the sound actually starts is searched for automatically when a track is selected, eliminating troublesome searching operations (Cue to Music)
- (7) Searching is possible in units of single frames (1/75 of a second), the minimum time unit on CDs, for maximum precision

In addition to the above functions (all provided on the DN-2000FMKII), the DN-2500F also includes the following functions:

- (8) The range of the pitch control slider is selectable between  $\pm 4\%$ ,  $\pm 8\%$  and  $\pm 16\%$
- (9) A Sampler function is included which provides over eight seconds of stereo sampling per side. Sample playback is triggered from the PLAY/PAUSE button while in sample mode (Sampler)
- (10) Familiar Jog/Shuttle dial controls allow fast and accurate searching of CD's (Jog Shuttle)
- (11) Key control function for adjusting the playback key (Key Control)
- (12) Voice Reducer function for reducing the sound of the vocals (Voice Reducer)
- (13) Brake function for gradually slowing the playback speed before stopping (Brake)
- (14) Memory function for recording and recalling disc identification data, cue point data, etc. (Custom Setting Memory)
- (15) Direct Search function for directly accessing a specific point on a disc or a specific index number using the number buttons (Direct Search)

- (16) Preset function for setting functions according to the usage purpose
- (17) Fader input (Mini Jack)
- (18) Servo Auto Stop function for Spindle Motor

**NOTE:**  
This CD player uses the semiconductor laser. To allow you to enjoy music at a stable operation, it is recommended to use this in a room of 5°C (41°F) - 35°C (95°F).

**CAUTION: (U.S.A. and Canada model only)**

Whenever the power switch is in the OFF state, the apparatus is still connected on AC line voltage. Please be sure to unplug the cord when you leave home for, say, a vacation.  
Be sure turn on POWER switch after a Remote cable of RC-44 is connected to the Player unit, otherwise, the apparatus may not work correctly.

**CAUTION: (Europe and Asia model only)**

To use the player, turn on the main power switch on the rear panel.  
Please be sure to turn off the main power switch when you leave home for, say, a vacation.

**DECLARATION OF CONFORMITY**

We declare under our sole responsibility that this product, to which this declaration relates, is in conformity with the following standards:  
EN60005, EN55013, EN55020, EN60555-2 and EN60555-3  
Following the provisions of 73/23/EEC, 89/336/EEC and 93/68/EEC Directive

## 1 PREPARATIONS

### (1) Checking the Contents

Check that the carton contains the following items:

- ① DN-2500F (main unit) ..... 1
- ② RC-44 (control unit) ..... 1
- ③ Operating instructions (this booklet) ..... 1
- ④ Pair of RCA pin cords ..... 2
- ⑤ Control cord (3-meter, 9.8 feet) ..... 1

### (2) Installing the Units

Mount the units onto your console or rack with 19" EIA rack rails.

- The DN-2500F will work normally when the main unit is mounted with the front panel within 20 degrees of the vertical plane. If the unit is tilted excessively, discs may not load or unload properly. (Figure 5)

Figure 5

### (3) Connections

- ① Turn off the POWER switch.
- ② Connect the RCA pin cords to the inputs on your mixer.
- ③ Connect the control cord to the REMOTE connector on the RC-44.

#### CAUTION:

- Be sure to use the supplied control cord. Using another type of cable may result in damage.
- Be sure the power is off when connecting the control cord. Otherwise the units may not work properly.

## 2 NAMES AND FUNCTIONS

Below is a description of the functions of the controls listed on Pages 4 and 5.

- (1) **DN-2500F (Main Unit) Front Panel**
  - 1 **POWER (Power Switch and Indicator)**  
When the POWER switch is pressed, the power turns on and the POWER indicator lights.
  - 3 **Disc Holders**  
Place the discs in these holders. Press the OPEN/CLOSE buttons to open and close the disc holders.
  - 4 **OPEN/CLOSE Buttons**  
Press these to open and close the disc holders. The control unit also includes OPEN/CLOSE buttons. The disc holders cannot be opened during playback, so playback must be stopped before pressing these buttons.
- (2) **RC-44 (Control Unit) Front Panel**
  - 5 **LCD**  
These liquid crystal displays (LCDs) indicate the current track numbers, minutes, seconds, frames and memory location numbers.
  - 6 **TIME Buttons**  
These buttons switch the time display between elapsed time and remaining time. The selected mode is indicated by the ELAPSED and REMAIN indicators on the LCD.
  - 7 **OPEN/CLOSE Buttons**  
Press these to open and close the disc holders. The main unit also includes OPEN/CLOSE buttons. The disc holders cannot be opened during playback, so playback must be stopped before pressing these buttons.
  - 8 **CONT./SINGLE Buttons**  
Press these to switch between the single and continuous play modes. The selected mode is indicated by the SINGLE and CONTINUE indicators on the LCD.
  - 9 **LOOP Buttons**  
Press these buttons to start loop mode. The LOOP LED is lit solid during loop playback.
  - 10 **INDEX Button**  
Press this button to turn the index mode on and off. The "INDEX" indicator lights when the index mode is turned on.
  - 11 **Shuttle Dials**  
Use these dials to select the scanning direction and speed. The disc is scanned in the forward direction when the Shuttle dial is turned clockwise from the neutral position, and in the reverse direction when the Shuttle dial is turned counterclockwise. The scanning speed increases as the wheel is turned further.
  - 12 **Jog Dials**  
When these dials are turned during the search operation, the point at which the sound is being produced moves by a number of frames corresponding to the number of clicks.
- (3) **RC-44 (Control Unit) Rear Panel**
  - 13 **A Buttons**  
Use these buttons to set the starting point for loop playback.
  - 14 **TRACK/INDEX SAMP PITCH -/+ Buttons**  
Use these buttons to select the track, the index, to be played. Also selects the sampler pitch during sample playback.
  - 16 **CUE Buttons**  
Press the CUE buttons during playback to return to the position at which playback started. The player is ready to play when the CUE LED stops flashing, remaining lit.
  - 17 **PLAY/PAUSE Buttons**  
Use these buttons to start playback. Press once to start playback, once again to set the pause mode, and once more to resume playback.
  - 18 **SAMPLER Buttons**  
Press these buttons to start recording the sample. Press the PLAY/PAUSE button after recording to set the sample play mode. These are also used to switch between the disc play and sample play mode.
  - 19 **B Buttons**  
Use these buttons to set the end point for loop playback.
  - 20 **EXIT/RELOOP Button**  
Press these buttons during loop playback to stop loop playback and continue normal playback past the B point (exit), or to return to loop playback for a loop which was previously exited (reloop).
  - 21 **Pitch Sliders**  
Use these sliders to adjust the BPM. Slide up to decrease the BPM, down to increase the BPM.
  - 22 **PITCH Buttons**  
Use these buttons to enable or disable pitch adjustment using the pitch sliders. Pitch adjustment with the pitch slider is enabled when the PITCH LED is lit.
  - 23 **KEY CONTROL Buttons**  
When these buttons are pressed, the key control mode is turned on and the key can be adjusted with the ▲ and ▼ buttons. When pressed again, the key adjust mode is turned on and the key remains the same even if the pitch is changed (KEY ADJUST). Press the buttons again to return to the normal mode.
- (4) **RC-44 (Control Unit) Rear Panel**
  - 24 **▼ Buttons**  
When the key control mode is on, press these buttons to lower the key.
  - 25 **▲ Buttons**  
When the key control mode is on, press these buttons to raise the key.
  - 26 **PITCH BEND - and PITCH BEND + Buttons**  
The pitch changes temporarily while these buttons are pressed. Release the buttons to return to the original BPM.
  - 28 **REVERSE Buttons**  
Press these buttons to turn the sampler's reverse playback mode on and off. After pressing the REVERSE button, the direction of playback does not change until the PLAY/PAUSE button is pressed. The REVERSE LED lights when the reverse playback mode is on.
  - 29 **1 and 2 Buttons**  
Use these buttons to select which player the number buttons will function for.
  - 31 **MEMO CALL Button**  
When the CD "1" or "2" button is pressed while pressing this button, the data stored in the memory is called out and set.
  - 32 **PRESET Button**  
Press the CD "1" or "2" button while pressing this button to set CD 1 or 2 to the preset data. Press this button to set the preset data. Press the button again while pressing the CD "1" or "2" button to turn the preset mode off.
  - 33 **CLEAR Button**  
Press this button to clear the data which was input using the number buttons.
  - 34 **0 - 9 Buttons (Number Buttons)**  
Use these buttons to input track numbers, times (minutes and seconds), and select the PRESET items.
  - 35 **VOICE REDUCER Button**  
When the CD "1" or "2" button is pressed while pressing this button, CD 1 or 2 is set to the voice reducer mode, and the level of the vocals in the music is reduced. (The "VRL" indicator lights.) Press the CD "1" or "2" button again while pressing the button to return to the normal playback mode. (The "VRL" indicator turns off.)
  - 36 **MEMO Button (Custom Setting Memory)**  
Press the CD "1" or "2" button while pressing this button to store the CD 1 or 2 settings (disc data, cue point, loop start point, loop end point, pitch). (The "MEMO" indicator lights.)
- (5) **LCD**  
These ten indicators provide a visual display of the approximate position of the pickup within the current track.
- (6) **ELAPSED Indicators**  
These indicate that the time shown on the display is the elapsed time.
- (7) **REMAIN Indicators**  
These indicate that the time shown on the display is the remaining time.
- (8) **SINGLE Indicators**  
When these indicators are lit, playback will stop at the end of the track.
- (9) **CONTINUE Indicators**  
When these indicators are lit, playback will continue until the end of the disc.
- (10) **BRAKE Button**  
When the CD "1" or "2" button is pressed while pressing this button, CD 1 or 2 is set to the brake mode and brake playback is enabled. (The "BRK" indicator lights.) Press the CD "1" or "2" button again while pressing the button to return to the normal playback mode. (The "BRK" indicator turns off.)
- (11) **DN-2500F (Main Unit) Rear Panel**
  - 13 **LINE OUT 1 and 2**  
The audio signals from each player are output from these jacks.
  - 14 **REMOTE**  
Connect this connector to the RC-44 control unit using the included control cord.
  - 15 **FADER IN Jack**  
Use this when using the unit with a console fader. (Mini Jack)
  - 16 **MAIN POWER (Europe and Asia Model only)**  
Make sure to switch on.
  - (12) **RC-44 (Control Unit) Rear Panel**
    - 17 **Control Connector**  
Connect this connector to the REMOTE connector on the DN-2500F (main unit) using the included control cord.
    - (13) **TRACK, MINUTE, SECOND and FRAME Displays**  
These displays indicate information on the current position and time.
    - (14) **BAR Indicator**  
These ten indicators provide a visual display of the approximate position of the pickup within the current track.
    - (15) **ELAPSED Indicators**  
These indicate that the time shown on the display is the elapsed time.
    - (16) **REMAIN Indicators**  
These indicate that the time shown on the display is the remaining time.
    - (17) **SINGLE Indicators**  
When these indicators are lit, playback will stop at the end of the track.
    - (18) **CONTINUE Indicators**  
When these indicators are lit, playback will continue until the end of the disc.

- 51 **Pitch Display**  
This indicates the playback speed (pitch). (-16.0 to +16.0)
- 52 **Key/Index Display**  
This indicates the key when in the key control mode. (-16.0 to +16.0)  
This also indicates the track's index number. (01 to 99)
- 53 **Index Indicator (INDEX)**  
This lights when the track's index number is displayed.
- 54 **Key Indicator (KEY)**  
This lights when the key is displayed.
- 55 **Custom Setting Memory Indicator (M)**  
This lights when there is data stored in the memory.
- 56 **Voice Reducer Indicator (VR)**  
This lights when the voice reducer mode is on.
- 57 **Brake Indicator (BK)**  
This lights when brake playback is enabled.

### 3 BASIC OPERATIONS

#### (1) Opening and Closing the Disc Holder and Loading Discs

- ① **Opening and closing the disc holder**
  - This operation only works when the power is on.
  - Press the OPEN/CLOSE button to open or close the disc holder. OPEN/CLOSE buttons are provided on both the main unit and control unit (RC-44).
  - The disc holders cannot be opened during playback to prevent playback from being interrupted if the OPEN/CLOSE button is pressed accidentally. Stop playback, then press the OPEN/CLOSE button.
- ② **Loading discs**
  - Hold the disc by the edges and place it in the disc tray. Do not touch the signal surface (the glossy side).
  - When using 12cm discs, place the disc in the outer tray guides (Figure 6), and when using 8cm discs, place them securely in the inner guides (Figure 7).

Figure 6

Figure 7

#### CAUTION:

- Do not place any foreign objects in the disc tray, and do not place more than one disc in the disc tray at a time. Doing so may result in malfunction.
- Do not push the disc tray in manually when the power is off, as this may result in malfunction and damage the player.

#### (2) Selecting Tracks or INDEX

- Press the TRACK buttons once to move to the next or preceding track.
- Hold down the TRACK buttons to change tracks continuously at a higher speed.
- When a new track is selected during playback, playback begins as soon as the search operation is completed.
- Tracks can also be selected while the disc holder is open. The selected track is searched for when the disc holder is closed.
- If the TRACK >>> button is pressed while on the last track, the first track is selected. Likewise, if the TRACK <<< button is pressed while on the first track, the last track is selected.

Figure 8

- When a track is selected, the DN-2500F automatically cues to the point at which the sound begins, skipping silent sections at the beginning of tracks. (Cue to Music) Level of cue point can be selected with preset item 4.
- When the INDEX button is pressed and the index search mode is set, use the INDEX >>> and <<< buttons for the index search operation.

#### (3) Starting Playback

- Press the PLAY/PAUSE button during pause or cue mode to start playback.
- Playback begins immediately when the PLAY button is pressed. (Instant Start)
- The PLAY/PAUSE LED lights when playback starts.
- The point at which playback starts is automatically stored in the memory as the cue point. When the CUE button is pressed, the pickup then returns to the cue point (the point at which playback started). (Back Cue)

Figure 9

- The play mode can be selected by pressing the CONT/SINGLE button.
- When the SINGLE indicator is lit, playback stops automatically at the end of that track, and the disc is cued to the playback start position.
- When the CONTINUE indicator is lit, playback continues until the end of that disc. When playback is finished, the disc is cued to the playback start position.

#### (4) Stopping Playback

- There are two ways to stop playback.
  - Press the PLAY/PAUSE button during playback to pause at that point.
  - Press the CUE button during playback to return to cue mode at the position at which playback started (Back Cue)

Figure 10

#### (5) Pausing

- Press the PLAY/PAUSE button to switch between play and pause mode.
- The PLAY/PAUSE LED blinks when the pause mode is set.
- Figure 11 shows the relationship between the play and pause

Figure 11

- The player has completed the cue or pause operation and is waiting for the play start command.
- When the PLAY/PAUSE button is pressed, playback starts and the cue point is stored in the memory.
- Playing
- The pause mode is set when the PLAY/PAUSE button is pressed again.
- Pausing
- Playback resumes when the PLAY/PAUSE button is pressed again.
- Playing

#### (6) Cueing

- "Cueing" is the action of moving to a specified point (the cue point) and waiting for playback to begin (cue mode). When the PLAY/PAUSE button is pressed after cueing, playback starts immediately (Instant Start)
- When the track search operation is completed after pressing the TRACK buttons, the player locates the position at which the sound starts and automatically cues there. (Cue to Music)
- If the CUE button is pressed during the search operation with the jog dial or the scanning operation with the shuttle dial, the point at which the button is pressed is set as the cue point and cueing starts.
- Figure 12 shows the relationship between the play and back cue operations.

(A) Play and cue (B) Play, pause and cue

- The player has completed the cue or pause operation and is waiting for the play start command
- When the PLAY/PAUSE button is pressed, playback starts and the cue point is stored in the memory.
- Playing
- The pause mode is set when the PLAY/PAUSE button is pressed again.
- Pausing
- When the PLAY/PAUSE button is pressed again, playback resumes and the new cue point is stored in the memory
- Playing
- Press the CUE button.
- The pickup returns to the cue point. (Back Cue)

Figure 12

#### (7) Searching

- Searching is the function which allows you to continuously monitor a certain section of the disc and manually change the playback position in small increments. Searching is used to set playback start points and loop points with precision.
- Turn the jog dial while in the play, pause or cue mode to begin searching. The sound for one revolution of the disc is output repeatedly. The point at which the sound starts (the search point) is indicated on the LCD.
- When the jog dial is turned, the point from which the sound is output moves a number of frames corresponding to the number of clicks, and the time display on the LCD also changes
- The search point moves in the forward direction when the jog dial is turned clockwise, in the reverse direction when the jog dial is turned counterclockwise.

Figure 13

- The search point displayed on the LCD during the search operation is automatically stored in the memory as the cue point.
- If the jog dial is turned while in play mode, playback resumes automatically once the jog dial is released.

## 2) Pitch Bending

- The BPM increases or decreases temporarily while the PITCH BEND- or PITCH BEND+ button is pressed
  - The extent to which the PITCH BEND button changes the BPM is proportionate to the amount of time the button is pressed
  - The longer the button is held down, the greater the percentage of change
  - The PITCH BEND button changes the BPM within a range of  $\pm 12\%$  when the pitch adjustment range is  $\pm 4\%$  or  $\pm 8\%$ , and within a range of  $\pm 18\%$  when the pitch adjustment range is  $\pm 16\%$ .
- Figure 16 shows an example of how to use the pitch bend function. In this example, both players are playing and the BPM has already been matched with the pitch sliders.

Figure 16

## 5 SEAMLESS LOOP

The DN-2500F is equipped with a seamless loop function.

**NOTE:** The seamless loop mode cannot be used at the same time as the sampler mode.

### 11) Starting seamless loop playback

(continued on next page)

### 8) Scanning

- Scanning allows you to move quickly forward or backward through the CD while monitoring the sound, and is used, for example, to locate a specific section in a song.
- Turn the shuttle dial while the player is in the play, pause or cue modes to begin scanning. The disc moves rapidly forward or backward and the sound is output. The current point (scan point) is indicated on the LCD.
- The scanning speed depends on how far from the center point the shuttle dial is turned. The more it is turned, the faster the scanning speed.
- Turn the shuttle dial clockwise to scan in the forward direction, counterclockwise to scan in the reverse direction.

Figure 14

#### 4 MATCHING THE BEATS PER MINUTE (BPM)

- With the DN-2500F, there are two ways to adjust the playing speed and match the BPMs of the two CDs:
  - Use the pitch slider to adjust the BPM statically. One of three adjustments ranges can be selected by the Preset Mode.
  - Use the PITCH BEND buttons to change the BPM temporarily. Use this after adjusting the BPM with the pitch slider.

**(1) Pitch Slider**

- To adjust the BPM by sliding the pitch slider up or down, first press the PITCH button to enable the pitch slider. The PITCH LED will turn on.
- With the pitch slider, the pitch can be adjusted within one of three ranges ( $\pm 4\%$ ,  $\pm 8\%$  or  $\pm 16\%$ ). (Can be selected with preset item 3)
- The BPM increases when the pitch slider is moved upwards, increases when the pitch slider is moved downwards.

Figure 15

- When the ending point (B) is set, playback starts from the starting point (A) with no interruption in the sound.
- After this, the section between the starting point (A) and the ending point (B) is played repeatedly with no interruption in the sound.

Figure 17

#### Alternative way to set the seamless loop starting point (A) and ending point (B)

- While the disc is playing, press the LOOP and B buttons. The last cue point is set as point A, and seamless loop playback begins.
- After setting point A, set the cue mode, press button A, then use the scan or search function to line-adjust point B. (The same can be done for point B.)

#### (2) Leaving the seamless loop mode temporarily

- Press the EXIT/RELOOP button while playing a seamless loop. (The LOOP button's LED starts flashing.)
- When the ending point (B) is reached, playback continues without returning to the starting point (A).

Figure 18

#### (3) Replaying a seamless loop

- Press the EXIT/RELOOP button or button B during normal playback. (The LOOP button's LED stops flashing, remaining lit.) (The position at which button B is pressed is set as the new loop playback ending point (B).)
- Playback returns to the starting point (A) and seamless loop playback begins.

Figure 19

#### (4) Switching from seamless loop playback to normal disc playback

(Setting the normal playback mode without cancelling the starting and ending points)

- Press the LOOP button within 1 second. (The LOOP button's LED turns off.) The normal playback mode is set. (Only the loop mode is canceled. Points A and B are not cleared.)

Figure 20

NOTE:

- The starting point (A) and ending point (B) settings are canceled when the disc is removed from the player.

#### (5) Canceling the seamless loop settings

Figure 21

- Press the LOOP button for over 1 second. (The LOOP button's LED turns off.) When this is done, the starting point (A) and ending point (B) settings are automatically canceled. (The A and B buttons' LEDs turn off.)

NOTE:

- After canceling the seamless loop during loop playback, it may take about 5 seconds before the seamless loop mode is set again.

### 6 SAMPLER

The DN-2500F is equipped with a function for recording the sound of a disc for up to 8 seconds on both players. In addition, the recorded sound can be played normally, in the reverse mode (backwards) and in a loop. These sampler functions eliminate the need for a separate sampler.

NOTE: The sampler mode cannot be used at the same time as the seamless loop mode.

#### (1) Recording samples

Figure 22

- Press the SAMPLER button. (The SAMPLER button's LED and the SAMP MODE LED start flashing.) Recording starts.
- The sound is recorded for approximately 8 seconds. (The SAMPLER button's LED stops flashing, remaining lit.) Recording can also be stopped in less than 8 seconds by pressing the CUE button. (The SAMPLER button's LED stops flashing, remaining lit.)

NOTE:

- When sample recording is set while the disc is playing, playback continues after recording stops.
- When sample recording is set during in the cue, pause or manual search mode, disc playback stops when recording stops.

## (2) Playing the sample

- Press the PLAY/PAUSE button.  
(The PLAY/PAUSE button's LED lights)  
The sample is played.

## (3) Stopping the sample

- Press the CUE button.  
(The CUE button's LED lights)  
The sample is stopped

## (4) Changing the sample's pitch

- Press the TRACK  $\blacktriangle\blacktriangleright$  button to increase the sample's playing speed.  
the TRACK  $\blacktriangle\blacktriangleright$  button to decrease it.  
The sample playing speed changes in steps of 0.5% and the speed flashes on the PITCH display section for approximately 3 seconds.  
(The sampler pitch range is  $\pm 16\%$ )

## (5) Setting the normal disc playback mode after recording a sample

- After the sample has been recorded, press the SAMPLER button.  
(The SAMP MODE LED turns off)  
Normal disc playback is now possible.  
The sample can be played again by pressing the SAMPLER button again.  
(The SAMP MODE LED flashes)

### NOTE:

- When the SAMP MODE LED is flashing, the following buttons function as sampler buttons, so they cannot be used for their normal operations:  
PLAY/PAUSE, CUE, TRACK  $\blacktriangle\blacktriangleright$ , TRACK  $\blacktriangleleft\blacktriangleleft$  (However, the TRACK  $\blacktriangle\blacktriangleright$  and  $\blacktriangleleft\blacktriangleleft$  buttons can be preset to be used as the normal track selection buttons. ITEM No. 21)
- The recorded sample is not cleared when the disc is removed from the player.

## (6) Playing the sample in reverse

- Press the REVERSE button.  
(The REVERSE button's LED lights)  
Reverse playback begins from the recording end position when the PLAY/PAUSE button is pressed after pressing the REVERSE button

- Press the REVERSE button again  
(The REVERSE button's LED turns off)  
The reverse sample play mode is canceled  
Sampler normal playback begins when the PLAY/PAUSE button is pressed after pressing the REVERSE button

## (7) Playing the sample in a loop

This setting can be turned on and off with the presets. (ITEM No. 1)

## (8) This clears the recorded sample

- Press the SAMPLER button for over 1 second  
(The SAMPLER button's LED and the SAMP MODE LED turn off)  
This clears the recorded sample

## 7 KEY CONTROL

The DN-2500F is equipped with a function for adjusting the key of the sound being played.

- Press the KEY CONTROL button.  
(The KEY CONTROL button's LED lit)  
(The current setting appears in the key section of the display)  
The key can be adjusted.  
Press the KEY  $\blacktriangle$  button to raise the key  
Press the KEY  $\blacktriangledown$  button to lower the key

The display changes

(continued on next page)

## 9 BRAKE

The DN-2500F is equipped with a function for gradually slowing the playback speed before stopping. This sound can be used as an effect sound. (Playback stops in about 0.5 seconds.)

Figure 31

- Press the CD 1 (or CD 2) button while pressing the BRAKE button. ("BRAKE" appears in the brake section of the display.) The brake function is set. Braking is performed when the PLAY/PAUSE button is pressed during playback while the brake mode is on.
- Once again press the CD 1 (or CD 2) button while pressing the BRAKE button. ("BRAKE" turns off from the brake section of the display.) The brake function is canceled.

## 10 CUSTOM SETTING MEMORY

The DN-2500F is equipped with a function for storing and calling out disc identification data, cue points, pitches, and seamless loop starting points (A) and ending points (B).

### (1) Storing data in the memory

Figure 32

- Cue up the player. Press the CD 1 (or CD 2) button while pressing the MEMO button. ("MEMO" appears in the memory section of the display, and the memory number (0 to 199) flashes for approximately 3 seconds in the key section of the display.) The above operation stores the following data in the memory:
  - Disc identification data
  - Cue point
  - Current playback pitch (0.0% if the pitch mode is off)
  - Seamless loop starting point (A) and ending point (B) (Only if set)
 In addition, if data is mistakenly registered, use the procedure in "(4) Clearing data" to clear the data.

### NOTE:

- In the cases described below, there is no space left in the memory. If you attempt to store data in the memory, "FL" appears and the data is not stored.
  - When there are already 200 sets of data stored in the memory (The maximum storage capacity is 200 discs and 200 sets of data.)
  - When data for that track is already stored in the memory. (Only one set of data can be stored per track.)

Figure 29

- Press the KEY CONTROL button again. ("HOLD" appears in the key section of the display.) The key can be adjusted to the normal key even when the pitch (speed) is changed.

### NOTE:

The key adjustment range is  $\pm 16.0$ .

- Press the KEY CONTROL button again. (The KEY CONTROL button's LED turns off.) The key control function is canceled.

## 8 VOICE REDUCER

The DN-2500F is equipped with a function to reduce the sound of the vocals in the music. This sound can be used as an effect sound for the sampler, etc.

Figure 30

- Press the CD 1 (or CD 2) button while pressing the VOICE REDUCER button. ("VRED" appears in the voice reducer section of the display.) The voice reducer function is set.
- Once again press the CD 1 (or CD 2) button while pressing the VOICE REDUCER button. ("VRED" turns off from the voice reducer section of the display.) The voice reducer function is canceled.

NOTE: Depending on the original recording, the vocals may not be completely eliminated. This is even more effective when used with music in which the vocals are at the center.

## (2) Overwriting previous data

(This is only possible if 200 sets of data are already stored.)

- Press the CD 1 (or CD 2) button while pressing the MEMO button. ("FL" flashes in the key section of the display)

- Use the number buttons to input the number of the memory to be overwritten. (The memory number flashes in the key section of the display)

Figure 33

- Press the MEMO button. ("LM" appears in the memory section of the display) The data is now overwritten

## (3) Recalling data

Figure 34

- When a custom setting memory disc is set in the player, the [LM] indicator flashes, indicating that there is a memory
- Use the TRACK [▶▶] and [◀◀] buttons to select the track whose data you want to recall ("LM" appears in the memory section of the display after the track is selected.)

- Press the CD 1 (or CD 2) button while pressing the MEMO CALL button. (The memory number (0 to 99) of the recalled data flashes for approximately 3 seconds in the key section of the display) The data is recalled and the pickup moves to the cue point stored in the memory. (The CUE button's LED lights. If seamless loop data is stored, the LOOP, A and B button's LEDs also light.) In addition, the playback pitch is fixed to the registered playback pitch. (The pitch LED flashes.)

**NOTE:** The track starting position changes through audio detection, so the time display of the called out cue point, A point and B point may be different from when the points were stored in the memory.

## (4) Clearing data

(continued on next page)

- Use the TRACK [▶▶] and [◀◀] buttons to select the track whose data you want to clear. ("LM" appears in the memory section of the display after the track is selected.)

Figure 35

- Press the CD 1 for CD 2) button while pressing the MEMO CALL button.
- Press the CLEAR button during the 3 seconds that the memory number (0 to 199) of the recalled data is flashing in the key section of the display. (The memory number and the "EL" turn off from the key and memory sections of the display.)  
The data is now cleared.

**NOTE:** Even when the data is cleared, the memory remains called out.

## 11 DIRECT SEARCH

The DN-2500F is equipped with a function for directly accessing a specific position on the disc or a specific index number using the number buttons and the CUE and PLAY/PAUSE buttons.

### (1) Direct track and time search

(continued on next page)

- Press the CD 1 for CD 2) button.

Figure 36

### (2) Direct index search

Set the index mode, then use the same procedure as for direct track and time search to directly access the specified index number.

## 12 PRESETTINGS

The DN-2500F is equipped with a function for storing various types of preset data. This data is not lost when the power is turned off. Use this function to store in the memory the desired settings for the items described on the table on Page 29. The presettings can be made independently for CD 1 and CD 2. Use this function to operate the players with the optimum settings.

### (1) Changing the preset data

(continued on next page)

- Press the CD 1 for CD 2) button while pressing the PRESET button. ("P-SEL" appears in the track and time sections of the display, and the key section turns off.)

**NOTE:** The preset item can also be changed during disc playback.

(2) Table of Preset Functions  
 --\*-- indicates factory settings

Item no.	Item	Display		Description
		Track/time	Key	
1	Sampler loop setting	1 5-L00P	ON OFF	Loop playback with sampler ON OFF • No loop playback with sampler
2	Pitch change setting during sample playback	25 5122B	ON OFF	• Pitch changed with sampler No pitch change with sampler When this is set, the track can be selected with the TRACK buttons
3	Pitch adjustment range setting	3 PITCH	4.0 8.0 16.0	4% Pitch can be increased or decreased within a range of $\pm 4\%$ 10 1% step 8% • Pitch can be increased or decreased within a range of $\pm 8\%$ 10 1% step 16% • Pitch can be increased or decreased within a range of $\pm 16\%$ 10 2% step
4	Cue detection level setting	47dB	L H	72dB Cueing is performed not at the actual starting point of the track but at the point where the sound starts. The level for detecting the first sound can be set to between -36dB and -72dB
5	EOM time setting	5 End	0sec 10sec 15sec 20sec 30sec 60sec 90sec	NOTE: For some discs the EOM time may not be accurate. ON: The disc holder closes automatically after it is left open for approximately 1 minute. OFF: The disc holder does not close automatically
6	Disc holder auto close setting	6 CLOSE	ON OFF	• Playback ends at the end of one track Continue Playback continues through to the end of the disc
7	Setting of initial playback mode when power is turned on	75 100%	EL RE	Elapse • The elapsed time is displayed when the power is turned on Remain • The remaining time is displayed when the power is turned on
8	Setting of initial time display mode when power is turned on	8 ELA RE	ON OFF	ON: The servo stops automatically OFF: The servo does not stop automatically Servo auto stop • If no button is pressed for approximately 30 minutes in the pause or cue up modes, the servo stops and "SLEEP" is displayed • Press the CUE button to switch from the servo stop mode to the normal mode
9	Servo auto stop setting	9 SLEEP	ON OFF	ON: All the memory data is cleared OFF: Not all the custom setting memory is cleared The setting returns to OFF after all the data is cleared
0	Custom Setting Memory all clear setting	0 RCL	ON OFF	ON: Sets the preset data to the factory settings OFF: Leaves the preset data unchanged
CLEAR	Reset to factory settings	PC-CL	ON OFF	

### 13 FADER INPUT

Fader playback is possible by connecting a console fader to the fader input plug.

Figure 38

- Playback starts when the switch is turned on.
- The pause mode is set when the switch is turned off. (FADER INPUT LEVEL HCMOS (I<sub>L</sub> = -3mA))

- Use the number buttons to input the number of the preset item. (The preset item number appears in the track and time sections of the display, and the preset data appears in the key section.)
- To select the preset data, press and hold in the number button corresponding to the preset item number. (The preset data in the key section of the display changes and flashes.)
- After selecting the preset data, press the PRESET button to set the new data. (The preset data in the key section of the display stops flashing, remaining lit.) Repeat the same procedure to change the data of other preset items.
- Press the CD 1 for CD 21 button while pressing the PRESET button or the CD 1 for CD 21 to exit the preset mode (The track, time and key sections of the display switch to their normal displays.) The preset data is now changed. Preset data changing can also be exited by pressing the PLAY/PAUSE, CUE or OPEN/CLOSE button

Figure 37

## 14 BEFORE SWITCHING OFF THE POWER

When you have finished using the CD player, before switching off the power, be sure that the disc holder has been closed with the OPEN/CLOSE button.

### CAUTION:

Do not forcibly close the disc holder when the power is off. It may damage the unit when it is transported.

Do not switch off the power when the disc holder is open.  
POWER OFF

Switch off the power after the disc holder has been closed with the OPEN/CLOSE button.  
POWER OFF

Figure 39

## 15 COMPACT DISCS

- Precautions on handling compact discs**
  - Do not allow fingerprints, oil or dust to get on the surface of the disc.
  - If the disc is dirty, wipe it off with a soft dry cloth. We recommend using DENON's AMC-22 CD CLEANER.
  - Do not use benzene, thinner, water, record spray, electrostatic-proof chemicals, or silicone-treated cloths to clean discs.
  - Always handle discs carefully to prevent damaging the surface, in particular when removing a disc from its case or returning it.
  - Do not bend the disc.
  - Do not apply heat.
  - Do not enlarge the hole in the center of the disc.
  - Do not write on the label (printed side) with a hard-tipped implement such as a pencil or ball point pen.
  - Condensation will form if a disc is brought into a warm area from a colder one, such as outdoors in winter. Do not attempt to dry the disc with a hair dryer, etc.

- Precaution on storage**
  - After playing a disc, always unfold it from the player.
  - Always store the disc in the jewel case to protect from dirt or damage.
  - Do not place discs in the following areas:
    - Areas exposed to direct sunlight for a considerable time.
    - Areas subject to accumulation of dust or high humidity.
    - Areas affected by heat from indoor heaters, etc.

## 16 SPECIFICATIONS

### GENERAL

#### Type:

Disc type:

Dimensions:

Twin mechanism compact disc player with wired controller  
Standard compact discs (12 cm and 8 cm discs)  
Player unit: 482 (W) × 88(H) × 252 (D) mm (without feet)  
19" (W) × 3-15/32 (H) × 9-59/64 (D)  
Control unit: 482 (W) × 132(H) × 40 (D) mm (without feet)  
19" (W) × 5-13/64 (H) × 1-37/64 (D)  
19-inch rack mountable  
Player unit: 2U  
Control unit: 3U  
Weight: 6 kg (13.23 lbs)  
Player unit: 3 kg (6.614 lbs)  
Control unit: 3 kg (6.614 lbs)  
U.S. and Canadian models: 120 V AC  
European models: 230 V AC  
Power consumption: 27 W  
Power consumption: 5 to 35°C  
Environmental conditions: 25 to 85%  
Operational temperature: -20 to 60°C  
Storage temperature: (41 to 95°F)  
Storage humidity: (no condensation)  
Connecting cord (2 pairs for left and right channels) (4 to 140°F)  
Control cord (5m, 15 feet)

## DISASSEMBLY

### ● TOP COVER

1. Remove 4 screws (108) on both sides, and 2 screws (101).
2. Pull up Top Cover.

### ● Front Panel

1. Remove 2 upper screws (101) and 3 lower screws (101), and 2 screws (101) on both sides.
2. Detach Front Panel.

## ● MECHANISM UNIT

1. Disconnect FFC cable.
2. Remove 4 screws (109) and 2 screws (104).

Note : ● Do not pull out aslant to prevent FFC cable damage.

- Do not fail to pull AC cord from wall outlet before disconnect the FFC cable .

If AC cord is remained plugged into wall outlet, power is kept supplied in the unit, which may cause danger.

## ● MECHA. PWB

1. Remove 3 screws (109).
2. Disconnect Connector.
3. Detach MECHA. PWB.

## ● COVER (REMOTE CONTROL UNIT)

1. Remove 5 screws (1 (103) and 4 (101)).

## CONFIRMING THE SERVO

### Required Measuring Implement

1. Dual trace oscilloscope
2. Reference disc (CA1094)

### 1. Actuating the Service Program and Servo Confirming Method

1. Turn the power switch off.
2. While simultaneously pushing the center blue buttons (1,2) of remote control (RC-44), turn the power on.
3. Displayed indication on the remote control (RC-44) is version number of microcomputer program.  
4 figures on the left are program version of remote control, and 4 figures on the right are program version of main body mechanism.

4. Press TRACK button once. Display shows "01" and each pressing of PLAY button opens or closes the tray.
5. As the tray opens, set the adjustment disc (CA-1094).
6. Press TRACK button ("02" is displayed), also, press PLAY button.  
Tracking error signal can be observed with the connection below. (Fig1)
7. Press TRACK button ("03" is displayed), also, press PLAY button.  
HF signal can be observed with the connection below. (Fig2)
8. Press TRACK button ("04" is displayed), also, press PLAY button.  
By pressing SEARCH button servo automatic adjustment value can be called. (Ref. Table below)

Fig1

Fig2

TRACK Portion Indication	Adjustment Item	Adjustment Value indication at M and S portions.	Adjustment Item No. indication at F portion.
04	Error Code	—	00
	Focus Gain (FG)	73 ~ 382	01
	Focus Balance (FBAL)	-100 ~ 100	02
	Focus Offset (FOFS)	-35 ~ 35	03
	Tracking Gain (TG)	53 ~ 336	04
	Tracking Balance (TBAL)	-110 ~ 86	05
	Tracking Offset (TOFS)	-15 ~ 15	06

\* When adjustment range exceeds, replace pick-up.

## 2. What is Service Program

Service program is a special program intended for confirming servo.

## 3. Contents of Service Program.

After actuating the service program, select an aiming process number with the TRACK (◀▶) buttons, TIME button, and PITCH button, and push the PLAY button to execute processing. The process number is then displayed on the TRACK indication portion.

TRACK BUTTONS	Work No. (TRACK Indication)	Function	Contents
◀▶	01	OPEN/CLOSE	Performs OPEN/CLOSE each time the PLAY button is pushed.
	02	Tracking Error	Checks tracking error signal.
	03	HF Signal	Checks HF signal.
	04	Automatic Adjustment call	Push tray to open automatically, press SEARCH button to call servo adjustment value.
	05	Cleaning of Pick-up Lens	Tray open and pick-up, moves out of mechanism and cleaning the lens.
	06	Focus Gain Changing	Select Gain with SEARCH (◀▶) button. When operating SEARCH (◀▶) button, minute and second indicator are blinked. Press [PLAY] or [CUE] button, the display lights that will be newly memory in EEPROM. When select data becomes big or small, the Gain is up or down. In normally, do not change the data that is settled by 750.0.
	07	Tracking Gain Changing	Select Gain with SEARCH (◀▶) button. When operating SEARCH (◀▶) button, minute and second indicator are blinked. Press [PLAY] or [CUE] button, the display lights that will be newly memory in EEPROM. When select data becomes big or small, the Gain is up or down. In normally, do not change the data that is settled by 1000.0. When sound out is occurred by oscillation, please raise gain. But there is sound out easily by defective disc.
TIME	0A	CHUCKING Test	Repeats OPEN/CLOSE of tray, servo ON, and TOC read.
PITCH	0B	Heat Run (No Skip Check)	Repeats OPEN/CLOSE of tray, repeats playing the first and the last programs of music on the disc. <u>When an error occurs, displays error code and stops.</u>

### Error Code Table (Appears only at Heat Run function)

Error Code at TRACK portion	Contents No. at M portion	Contents
E1	00	Automatic Adjustment Error
	01	Unable to detect disc
	02	Unable to adjust tracking offset
	03	Unable to adjust focus offset
	04	Unable to adjust focus fine gain
	05	Unable to actuate focus
	06	Unable to actuate tracking
	07	Unable to adjust tracking fine gain
E2	00	Unable to adjust EF balance
	01	Unable to adjust focus balance
E3	00	Servo down during playback
E4	01	Not read subcode
E5		Unable to read TOC
E6		Loader error
E7		Slide error

Detailed error can be displayed by pushing TRACK button ◀▶ when error occurs.

LCD Error indication			
TR	MIN	SEC	FRAM
Error Code	Contents No.	Accumulated number of open/close function of the tray prior to Error occurs.	
Indication state when error occurs			
01	FG data	01	
02	FBAL data	02	
03	FOFS data	03	
04	TG data	04	
05	TBAL data	05	
06	TOFS data	06	

# IC TERMINAL FUNCTION LIST

## AN8805S (IC102) (Mecha unit)

## AN8805S Terminal Function

Pin No.	Symbol	I/O	Function
1	PD	I	Inputs PD signal for output monitor of LD.
2	LD	O	Connet to external transistor's base for LD drive.
3	LDON	I	Shifts LD APC ON/OFF.
4	C.CRS	—	Capacitor connecting terminal for CROSS.
5	VCC	—	Power supply connecting terminal.
6	RF-	I	RF AMP reversal input terminal. Connect a resistor.
7	RFOUT	O	RF AMP output terminal (reversal AMP).
8	RFIN	I	Input terminal of RF AGC.
9	C. AGC	—	Capacitor connecting terminal for RF AGC loop filter.
10	ARF	O	RF output terminal of after AGC.
11	C. ENV	—	Capacitor connecting terminal for RF.
12	C. EA	—	Capacitor connecting terminal for AMP.
13	C. SBDO	—	Capacitor connecting terminal for low speed detection of dark level DO detection.
14	BDO	O	BDO detection output terminal. Positive logic.
15	C. SBRT	—	Capacitor connecting terminal for low speed detection of OFTR detection.
16	OFTR	O	Output terminal of OFF TRACK detection. Positive logic.
17	NRFDET	O	Output terminal of RF signal amplitude detection. Negative logic.
18	GND	—	GND.
19	ENV	O	ENV output terminal.
20	VREF	O	VCC x 0.5(V) output terminal.
21	LD OFF	I	Input terminal of LD APC forcible stop.
22	VDET	O	Output terminal of vibration detection.
23	TEBPF	I	Input terminal of vibration detection.
24	CROSS	O	Output terminal of TE CROSS detection signal.
25	TEOUT	O	Output terminal of TEAMP.
26	TE-	I	TEAMP reversal input terminal. Connect a resistor.
27	FEOUT	O	Output terminal of FEAMP.
28	FE-	I	FEAMP reversal input terminal. Connect a resistor.
29	FBAL	I	Control signal input terminal of FO balance adjustment.
30	TBAL	I	Control signal input terminal of TE balance adjustment.
31	PDFR	—	Resistor connecting terminal for setting IV converting resistance value of PDE.
32	PDER	—	Resistor connecting terminal for setting IV converting resistance value of PDF.
33	PDE	I	Connect to PIN diode E.
34	PDF	I	Connect to PIN diode F.
35	PDBD	I	Connect to B,D of astigmatism 1/4 divided PD.
36	PDAC	I	Connect to A,C of astigmatism 1/4 divided PD.

**MN662720 (Mecha unit)**  
**(IC101)**

**MN662720 Terminal Function**

Pin No.	Symbol	I/O	Function
1	BCLK	O	Bit clock output for SRDATA.
2	LRCK	O	L,R discrimination signal output.
3	SRDATA	O	Serial data output.
4	DVDD1	I	Power supply for digital circuit.
5	DVSS1	I	GND for digital circuit.
6	TX	O	Digital audio interface output signal.
7	MCLK	I	Microcomputer command clock signal input (latches data at rising edge).
8	MDATA	I	Microcomputer command data input.
9	MLD	I	Microcomputer command load signal input. ("L": load)
10	SENSE	O	Sens signal output (OFT, FESL, NACEND, NAJEND, POSAD, SFG).
11	FLOCK	O	Focus servo draw in signal ("L": draw in state).
12	TLOCK	O	Tracking servo draw in signal ("L": draw in state).
13	BLKCK	O	Subcode block clock signal (fGLKCK=75Hz).
14	SQCK	I	External clock input for subcode Q register.
15	SUBQ	O	Subcode Q code output.
16	DMUTE	I	Muting input ("H": mute).
17	STAT	O	Status signal (CRC, CUE, CLVS, TTSTOP, FCLV, SQOK).
18	RST	I	Reset input ("L": reset).
19	SMCK	O	8.4672MHz clock signal output at MSEL="H". 4.2336MHz clock signal output at MSEL="L".
20	PMCK	O	88.2kHz clock output.
21	TRV	O	Traverse forcible sending output.
22	TVD	O	Traverse drive output.
23	PC	O	Spindle motor ON signal ("L": ON).
24	ECM	O	Spindle motor drive signal (forcible mode output). 3-state.
25	ECS	O	Spindle motor drive signal (servo error signal output).
26	KICK	O	Kick pulse output.
27	TRD	O	Tracking drive output.
28	FOD	O	Focus drive output.
29	VREF	I	Reference voltage for DA output portion (TVD,BCS,TRD,FOD,FBAL,TBAL).
30	FBAL	O	Focus balance adjusting output.

Pin No.	Symbol	I/O	Function
31	TBAL	O	Tracking balance adjusting output.
32	FE	I	Focus error signal input (analog input).
33	TE	I	Tracking error signal input (analog input).
34	RFENV	I	RF envelope signal input (analog input).
35	VDET	I	Vibration detecting signal input ("H": detect).
36	OFT	I	Off track signal input ("H": off track).
37	TRCRS	I	Track cross signal input.
38	RFDET	I	RF detecting signal input ("L": detect).
39	BDO	I	Drop out signal input ("H": drop out).
40	LDON	O	Laser ON signal output ("H": ON).
41	TES	O	Tracking error shunt signal output ("H": shunt).
42	PLAY	O	Play signal output ("H": play).
43	WVEL	O	Double speed status signal output.
44	ARF	I	RF signal input.
45	IREF	I	Reference current input terminal.
46	DRF	I	Bias terminal for DSL.
47	DSLIF	I/O	Loop filter terminal for DSL.
48	PLLF	I/O	Loop filter terminal for PLL.
49	VCOF	I/O	Loop filter terminal for VCO.
50	AVDD2	I	Power supply for analog circuit (for DSL, PLL, DA output sections).
51	AVSS2	I	GND for analog circuit (for DSL, PLL, DA output sections).
52	EFM	O	EFM signal output.
53	PCK	O	PLL extract clock output (fPCK=4.321MHz).
54	PDO	O	Phase comparing signal output of EFM signal and PCK signal.
55	SUBC	O	Subcode serial output data output.
56	SBCK	I	Clock input for subcode serial output.
57	VSS	I	GND for osc. circuit.
58	X1	I	X'tal osc. circuit input terminal. f=16.9344MHz or 33.8688MHz.
59	X2	O	X'tal osc. circuit output terminal (use 33.8688MHz at double speed PB).
60	VDD	I	Power supply for osc. circuit.
61	BYTCK	O	Byte clock output.
62	CLDCK	O	Subcode frame clock signal output (fCLDCK=7.35kHz).
63	FCLK	O	X'tal frame clock output (fFCLK=7.35kHz).
64	IPFLAG	O	Interpolation flag output ("H": interpolation).
65	FLAG	O	Flag output.
66	CLVS	O	Spindle servo phase sync state signal output ("H":CLV, "L":rough servo).
67	CRC	O	Subcode CRC check result output ("H":OK, "L":NG).
68	DEMPH	O	Deemphasis detecting signal output ("H":ON).
69	RESY	O	Flag 6 output at SSEL:"H"(RAM address reset generating signal by Jitter margin over of CLV servo. "L":address reset generates). RESY output at SSBL:"L"(Re-sync signal output of frame sync. "H": sync, "L":out sync).
70	NC1	NC	Non connection terminal (not connected internally).
71	TEST	I	Test terminal (normally "H").
72	AVDD1	I	Power supply for digital circuit.
73	NC2	NC	Non connection terminal(not connected internally).
74	AVSS1	I	GND for digital circuit.
75	NC3	NC	Non connection terminal (not connected internally).
76	RSEL	I	RF signal polarity specify terminal (RSEL="H" at brightness level "H". RSEL="L" at brightness level "L").
77	CSEL	I	X'tal osc. frequency specify terminal, X'tal osc. freq. 33.8688MHz:CSEL"H", 16.9344MHz:CSEL"L".
78	PSEL	I	Test terminal (normally "L").
79	MSEL	I	SMCK terminal. Output frequency shifting terminal ("H":SMCK=8.4672MHz, "L":SMCK=4.2336MHz).
80	SSEL	I	Sub Q terminal. Output mode shifting terminal ("H":Q code buffer using mode).

μPD784021GC-3B9 (Mecha Unit)  
(IC201)

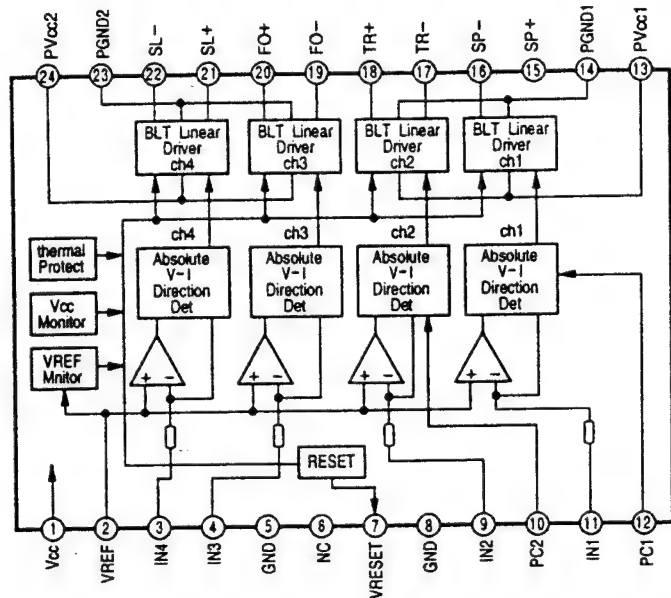

μPD784021GC-3B9 Terminal Function

Pin No.	Terminal Name	Symbol	I/O	Reset	Initial	Active	Function
1	P32/SCK	SCL	O	Z	H	—	Serial communication data output to MN19412A, MN19413.
2	P33/S00/SBO	SDA	O	Z	H	—	Serial communication clock output to MN19412A, MN19413.
3	P34/TO0	VCOCK	O	Z	H	—	44.1 kHz clock output to MN19413.
4	P35/TO1	MLE	O	Z	H	—	SM5841BS command latch.
5	P36/TO2	CLK	O	Z	H	—	Clock for MN662720, SM5841BS command output.
6	P37/TO3	MDATA	O	Z	H	—	MN662720, SM5841BS command data.
7	RESET	RESET	I	L	—	L	Reset signal input (reset at "L").
8	V <sub>DD</sub>	V <sub>DD</sub>	—				Microcomputer power supply (+5V).
9	X2	X2	—				Open.
10	X1	X1	I				System clock input (24.57 MHz).
11	V <sub>SS</sub>	V <sub>SS</sub>	—				Microcomputer GND.
12	PO0	DMUTE	O	Z	L	H	MN662720 digital mute.
13	PO1	MLD	O	Z	H	L	MN662720 command latch.
14	PO2	SENSE	I	Z	—	—	MN662720 servo state input signal.
15	PO3	FLOCK	I	Z	—	L	MN662720 focus servo Lead-in signal.
16	PO4	TLOCK	I	Z	—	L	MN662720 tracking servo Lead-in signal.
17	PO5	SQCK	O	Z	H	—	MN662720 subcode Q register reading clock.
18	PO6	SUBQ	I	Z	—	—	MN662720 subcode Q input.
19	PO7	STAT	I	Z	—	—	MN662720 status signal.
20	P67/REFRQ/HLDAK	RST	O	L	L	L	MN662720, AN8805 reset signal.
21	P66/WAIT/HLDRQ	RST-D	O	Z	L	L	SM5841BS, MN19413, MN19412A reset signal.
22	P65/WR	—	O	Z	—	—	Not used (open).
23	P64/RD	—	O	Z	—	—	Not used (open).
24	P63/A19	—	O	Z	L	—	Not used (open).
25	P62/A18	—	O	Z	L	—	Not used (open).
26	P61/A17	—	O	Z	L	—	Not used (open).
27	P60/A16	—	O	Z	L	—	Not used (open).
28	P57/A15	A15					Address bus.
29	P56/A14	A14					Address bus.

Pin No.	Terminal Name	Symbol	I/O	Reset	Initial	Active	Function
30	P55/A13	A13					Address bus.
31	P54/A12	A12					Address bus.
32	P53/A11	A11					Address bus.
33	P52/A10	A10					Address bus.
34	P51/A9	A9					Address bus.
35	P50/A8	A8					Address bus.
36	P47/AD7	AD7					Address/data bus.
37	P46/AD6	AD6					Address/data bus.
38	P45/AD5	AD5					Address/data bus.
39	P44/AD4	AD4					Address/data bus.
40	P43/AD3	AD3					Address/data bus.
41	P42/AD2	AD2					Address/data bus.
42	P41/AD1	AD1					Address/data bus.
43	P40/AD0	AD0					Address/data bus.
44	ASTB/CLKOUT	ASTB					Address strobe terminal (address bus effective at "L").
45	Vss	Vss					GND.
46	TEST	—					Connect to 0V.
47	P10/PWM0	PO0	I	Z	—	—	Status data input 0 of MN19413.
48	P11/PWM1	PO1	I	Z	—	—	Status data input 1 of MN19413.
49	P12/ASCK2/SCK2	PO3	O	Z	L	H	MN19412 port command output permitting signal.
50	P13/RxD2/SI2	—	—	Z	—	—	Not used (open).
51	P14/TxD2/SO2	—	—	Z	—	—	Not used (open).
52	P15	TXDEN	O	Z	H	L	IC enable signal for M5M3045 serial communication.
53	P16	P10	I	Z	—	—	Status data input 0 of MN19412A.
54	P17	P11	I	Z	—	—	Status data input 1 of MN19412A.
55	VDD	VDD	—				Microcomputer power supply (+5V).
56	P70/ANI0	ADDRO	O	Z	L	—	Address designated signal for MN19412A command output.
57	P71/ANI1	OPEN	O	L	L	—	Tray OPEN switch ON.
58	P72/ANI2	CLOSE	O	L	L	—	Tray CLOSE switch ON.
59	P73/ANI3	LDOUT	I	Z	—	L	Tray OPEN detection switch input.
60	P74/ANI4	LDIN	I	Z	—	L	Tray CLOSE detection switch input.
61	P75/ANI5	AMUTE	O	L	L	L	Analog mute.
62	P76/ANI6	STIN1	I	Z	—	L	RC44 communication status input.
63	P77/ANI7	CDSEL	I	Z	—	—	Microcomputer ID (0: CD1, 1: CD2).
64	AVDD	AVDD					A/D converter power supply (+5V).
65	AVref1	AVref1					A/D converter reference voltage (+5V).
66	AVss	AVss	—				GND for A/D converter (0V).
67	ANO0	STOUT	O	OV	H	—	RC44 communication status output.
68	ANO1	—	O	OV	H	—	Not used (open).
69	AVref2	AVref2					Connect to 5V.
70	AVref3	AVref3					A/D converter reference voltage input (+side) (+5V).
71	P20/NMI	—	I	Z	—	—	A/D converter reference voltage input (–side) (0V).
72	P21/INTP0	EJSW	I	Z	—	L	Eject switch input.
73	P22/INTP1	INSW	I	Z	—	L	Slide inner switch input.
74	P23/INTP2/CI	BLKCK	I	Z	—	L	Subcode block clock input.
75	P24/INTP3	FCLK	I	Z	—	L	Frame count clock input.
76	P25/INTP4/ASCK/SCK1	FADE	I	Z	—	—	Fader input. ↓ Starts playback, ↑ Pause.
77	P26/INTP5	—	I	Z	—	—	Not used (connect to 0V).
78	P27/SI0	—	I	Z	—	—	Not used (connect to 0V).
79	P30/RxD/SI1	RXD	I	Z	—	—	Serial communication data input from remote control.
80	P31/TxD/SO1	TXD	O	Z	—	—	Serial communication data output to remote control.

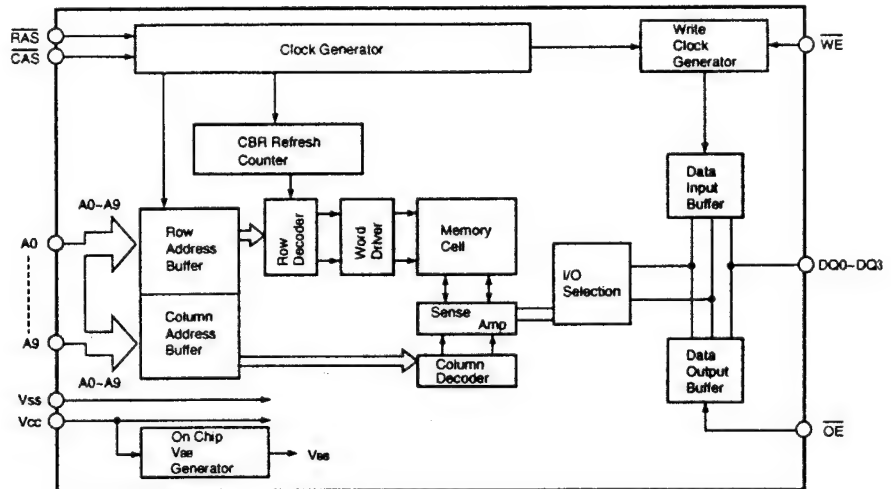

## AN8389 (IC103) (Mecha unit)

## AN8389 Terminal Function

Pin No.	Symbol	I/O	Function
1	ACC	—	Power supply.
2	VREF	I	VREF input terminal.
3	IN4	I	Motor driver 4 input terminal.
4	IN3	I	Motor driver 3 input terminal.
5	GND	—	GND.
6	NC	—	
7	NRESET	O	Reset output terminal.
8	GND	—	GND.
9	IN2	I	Motor driver 2 input terminal.
10	PC2	I	PC2 (power cut) input terminal.
11	IN1	I	Motor driver 1 input terminal.
12	PC1	I	PC1 (power cut) input terminal.
13	PVCC1	—	Power supply terminal1 for driver.
14	PGND1	—	GND terminal1 for driver.
15	SP+	O	Motor driver 1 reversal output terminal, spindle motor drive.
16	SP-	O	Motor driver 1 obverse output terminal, spindle motor drive.
17	TR-	O	Motor driver 2 reversal output terminal.
18	TR+	O	Motor driver 2 obverse output terminal.
19	FO-	O	Motor driver 3 reversal output terminal.
20	FO+	O	Motor driver 3 obverse output terminal.
21	SL+	O	Motor driver 4 reversal output terminal, slide motor drive.
22	SL-	O	Motor driver 4 obverse output terminal, slide motor drive.
23	PGND2	—	GND terminal 2 for driver.
24	PVCC2	—	Power supply terminal2 for driver.

**MN41440CSJ-07 (Mecha unit)**  
**(IC304,305)**

**MN41440CSJ-07 Terminal Function**

Pin No.	Symbol	I/O	Function
1	DQ0	I/O	Data input/output.
2	DQ1	I/O	Data input/output.
3	WE	I	Write enable input.
4	RAS	I	Row address strobe.
5	A9	I	Address input.
6	A0	I	Address input.
7	A1	I	Address input.
8	A2	I	Address input.
9	A3	I	Address input.
10	Vcc	—	Power supply (+5V).
11	A4	I	Address input.
12	A5	I	Address input.
13	A6	I	Address input.
14	A7	I	Address input.
15	A8	I	Address input.
16	OE	I	Output enable input.
17	CAS	I	Column address strobe.
18	DQ2	I/O	Data input/output.
19	DQ3	I/O	Data input/output.
20	Vss	—	Power supply (0V).

**MN19412A (Mecha Unit)**  
(IC301)

**MN19412A Terminal Function**

Pin No.	Symbol	I/O/T	Function
1	N.C.	—	Non connection.
2	SOEN2	I	Output enable for serial output 2.
3	SCKO2	I	Serial clock for serial output 2.
4	SDO3	O/T	Data for serial output 3.
5	WSO3	I	Word select for serial output 3.
6	SCKO3	I	Serial clock for serial output 3.
7	SOEN3	I	Output enable for serial output 3.
8	Vss	—	GND terminal (0V).
9	Vss	—	GND terminal (0V).
10	XCAS	O	Column address strobe for external DRAM. Open when not used.
11	XOE	O	Output enable for external RAM.
12	A14	O	Address 14 for external RAM.
13	A13	O	Address 13 for external RAM.
14	A12	O	Address 12 for external RAM.
15	A11	O	Address 11 for external RAM.
16	A10	O	Address 10 for external RAM.
17	A9	O	Address 9 for external RAM.
18	A8	O	Address 8 for external RAM.
19	A7	O	Address 7 for external RAM.
20	A6	O	Address 6 for external RAM.
21	N.C.	—	Non connection.
22	A5	O	Address 5 for external RAM.
23	A4	O	Address 4 for external RAM.
24	A3	O	Address 3 for external RAM.
25	A2	O	Address 2 for external RAM.
26	A1	O	Address 1 for external RAM.
27	A0	O	Address 0 for external RAM.
28	XCE2	O	Chip enable 2 for external SRAM.
29	XCE1	O	Chip enable 1 for external SRAM.
30	XRAS	O	Row address strobe for external DRAM. Open when not used.

Pin No.	Symbol	I/O/T	Function
31	XWE	O	Write enable for external RAM.
32	VSS	—	GND terminal (0V).
33	VSS	—	GND terminal (0V).
34	D7	I/O	Data 7 for external RAM (Connect to D4~7 when one DRAM is used).
35	D6	I/O	Data 6 for external RAM.
36	D5	I/O	Data 5 for external RAM.
37	D4	I/O	Data 4 for external RAM.
38	D3	I/O	Data 3 for external RAM.
39	D2	I/O	Data 2 for external RAM.
40	D1	I/O	Data 1 for external RAM.
41	D0	I/O	Data 0 for external RAM.
42	P7	I/O/T	General purpose port 7.
43	P6	I/O/T	General purpose port 6.
44	P5	I/O/T	General purpose port 5.
45	P4	I/O/T	General purpose port 4.
46	P3	I/O/T	General purpose port 3.
47	P2	I/O/T	General purpose port 2.
48	P1/PT1	I/O/T	General purpose port 1/Flag 1 for condition dividing.
49	P0/PT0	I/O/T	General purpose port 0/Flag 0 for condition dividing.
50	N.C.	—	Non connection.
51	SYNC	I	Input for program sync (condition input).
52	VDD	—	Power supply terminal.
53	INT0	I	Interrupt input 0.
54	INT1	I	Interrupt input 1.
55	XRESET	I	System reset input.
56	VSS	—	GND terminal (0V).
57	CLKI	I	System clock input.
58	CLKO	O	System clock output.
59	VDD	—	Power supply terminal.
60	VDD	—	Power supply terminal.
61	ADDR0	I	Address select 0 for IIC bus.
62	ADDR1	I	Address select 1 for IIC bus.
63	XCE	I	Chip enable for IIC bus.
64	IICSEL	I	IIC/IC switching for IIC bus.
65	XTRANS	I	Data transfer control for IIC bus.
66	SDA	I/O	Serial data for IIC bus.
67	SCL	I/O	Serial clock for IIC bus.
68	MATCH	O	Address match at coefficient input for IIC bus.
69	SDI1	I	Data for serial input 1.
70	WSI1	I	Word select for serial input 1.
71	N.C.	—	Non connection.
72	SCKI1	I	Serial clock for serial input 1.
73	SDI2	I	Data for serial input 2.
74	WSI2	I	Word select for serial input 2.
75	SCKI2	I	Serial clock for serial input 2.
76	VDD	—	Power supply terminal.
77	VDD	—	Power supply terminal.
78	SDO1	O/T	Data for serial output 1.
79	WSO1	I	Word select for serial output 1.
80	N.C.	—	Non connection.
81	SCKO1	I	Serial clock for serial output 1.
82	SOEN1	I	Output enable for serial output 1.
83	SDO2	O/T	Data for serial output 2.
84	WSO2	I	Word select for serial output 2.

**MN19413 (Mecha Unit)**  
**(IC303)**

**MN19413 Terminal Function**

Pin No.	Symbol	I/O/T	Function
1	RP	O	D/A Rch analog output (positive).
2	RN	O	D/A Rch analog output (negative).
3	VDD	—	Digital system power supply (5V).
4	SCKI	I	Serial clock for serial input.
5	WSI	I	Word select for serial input.
6	SDI	I	Data for serial input.
7	SDO2	O	Data for serial output 2.
8	SDO1	O	Data for serial output 1.
9	WSO	O	Word select for serial output.
10	SCKO	O	Serial clock for serial output.
11	Vss	—	Digital system GND terminal (0V).
12	P3	I/O/T	General purpose port 3.
13	P2	I/O/T	General purpose port 2.
14	P1/PT1	I/O/T	General purpose port 1/Flag 1 for condition dividing.
15	P0/PT0	I/O/T	General purpose port 0/Flag 0 for condition dividing.
16	SYNC	I	Input for program sync (condition input).
17	INT1	I	Interrupt input 1.
18	INT0	I	Interrupt input 0.
19	XTEST1	I	Test input (normally 5V).
20	XRESET	I	System reset input.
21	ADDR0	I	Address select 0 for IIC bus.
22	ADDR1	I	Address select 1 for IIC bus.
23	SCL	I/O	Serial clock for IIC bus.
24	SDA	I/O	Serial data for IIC bus.
25	XCE	I	Chip enable for IIC bus.
26	MATCH	O	Address match at coefficient input for IIC bus.
27	VDD	—	Digital system power supply (5V).
28	A16	O	Address 16 for external RAM (open when address is not used).
29	A15	O	Address 15 for external RAM.
30	A14	O	Address 14 for external RAM.
31	A13	O	Address 13 for external RAM.
32	A12	O	Address 12 for external RAM.
33	A11	O	Address 11 for external RAM.
34	A10	O	Address 10 for external RAM.
35	A9	O	Address 9 for external RAM.
36	A8	O	Address 8 for external RAM.
37	A7	O	Address 7 for external RAM.
38	A6	O	Address 6 for external RAM.
39	A5	O	Address 5 for external RAM.
40	Vss	—	Digital system GND terminal (0V).

Pin No.	Symbol	I/O/T	Function
41	A4	O	Address 4 for external RAM.
42	A3	O	Address 3 for external RAM.
43	A2	O	Address 2 for external RAM.
44	A1	O	Address 1 for external RAM.
45	A0	O	Address 0 for external RAM.
46	XRAS	O	Row address strobe for external DRAM (open when not used).
47	XCAS	O	Column address strobe for external DRAM (open when not used).
48	XWE	O	Write enable for external RAM.
49	XOE	O	Output enable for external RAM.
50	XCE2	O	Chip enable 2 for external SRAM.
51	XCE1	O	Chip enable 1 for external SRAM.
52	V <sub>DD</sub>	—	Digital system power supply (5V).
53	D7	I/O	Data 7 for external RAM (connect to D4~7 when one DRAM is used).
54	D6	I/O	Data 6 for external RAM.
55	D5	I/O	Data 5 for external RAM.
56	D4	I/O	Data 4 for external RAM.
57	D3	I/O	Data 3 for external RAM.
58	D2	I/O	Data 2 for external RAM.
59	D1	I/O	Data 1 for external RAM.
60	D0	I/O	Data 0 for external RAM.
61	V <sub>SS</sub>	—	Digital system GND terminal (0V).
62	XI2	I	System clock 2 input.
63	XO2	O	System clock 2 output.
64	TEST0	I	Test input (normally 0V).
65	XI1	I	System clock 1 input.
66	XO1	O	System clock 1 output.
67	XISEL	I	System clock selection. (O: XI2, I: XI1).
68	V <sub>DD</sub>	—	Digital system power supply (5V).
69	RX2	I/O	Digital audio signal input.
70	FL2	O	RX2 feedback signal output.
71	DIR	I	DIR selection (1: use internal DIR).
72	RX1	I/O	Digital audio signal input 1.
73	FL1	O	RX1 feedback signal output.
74	CSEL	I	A/D, D/A master clock selection (0: 256fs, 1: 384fs).
75	RXO	O	Digital audio signal output.
76	POLPD	I	PCO output polarity selection.
77	CLKI	I	VCO clock input (connect VCO output [VCOO]).
78	V <sub>DD</sub>	—	Digital system power supply (5V).
79	VCOO	O	Built-in VCO output.
80	VCOI	I	Built-in VCO input.
81	PCO	O	PLL phase compare output.
82	UNLOCK	O	PLL unlock flag output.
83	V <sub>SS</sub>	—	Digital system GND terminal (0V).
84	ZFLG	O	D/A $\infty$ 0 input detection output.
85	VREFR	—	A/D Rch reference voltage terminal (1.0V).
86	AINR	I	A/D Rch analog input terminal.
87	N.C.	—	Non connection.
88	VREFL	—	A/D Lch reference voltage terminal (1.0V).
89	VBOP	—	Built-in operation Amp. bias voltage terminal (2.5V).
90	N.C.	—	Non connection.
91	ADV <sub>DD</sub>	—	A/D analog system power supply terminal (5V).
92	ADV <sub>SS</sub>	—	A/D analog system GND terminal (0V).
93	AINL	I	A/D Lch analog input terminal.
94	VGAD	—	A/D analog GND (2.5V).
95	N.C.	—	No connection.
96	VGDA	—	A/D analog GND (1.5V).
97	DAV <sub>SS</sub>	—	D/A analog system GND terminal (0V).
98	DAV <sub>DD</sub>	—	D/A analog system power supply terminal (5V).
99	LP	O	D/A Lch analog output (positive).
100	LN	O	D/A Lch analog output (negative).

## NOTE FOR PARTS LIST

- Part indicated with the mark "◎" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.
- When ordering of part, clearly indicate "1" and "1" (i) to avoid mis-supplying.
- Ordering part without stating its part number can not be supplied.
- Part indicated with the mark "★" is not illustrated in the exploded view.
- Not including Carbon Film  $\pm 5\%$ , 1/4W Type in the P.W.Board parts list. (Refer to the Schematic Diagram for those parts.)

**WARNING:**

Parts marked with this symbol  have critical characteristics.

Use ONLY replacement parts recommended by the manufacturer.

## ● Resistors

Ex.: RN 14K 2E 182 G FR  
 Type Shape and performance Power Resistance Allowable error Others

RD : Carbon	2B : 1/8W	F : $\pm 1\%$	P : Pulse-resistant type
RC : Composition	2E : 1/4W	G : $\pm 2\%$	NL : Low noise type
RS : Metal oxide film	2H : 1/2W	J : $\pm 5\%$	NB : Non-burning type
RW : Winding	3A : 1W	K : $\pm 10\%$	FR : Fuse-resistor
RN : Metal film	3D : 2W	M : $\pm 20\%$	F : Lead wire forming
RK : Metal mixture	3F : 3W		
	3H : 5W		

## ● Resistance

1 8 2  $\Rightarrow$  1800 ohm = 1.8 kohm  
 Indicates number of zeros after effective number.  
 2-digit effective number.

• Units: ohm

1 R 2  $\Rightarrow$  1.2 ohm  
 1-digit effective number.  
 2-digit effective number, decimal point indicated by R.

• Units: ohm

## ● Capacitors

Ex.: CE 04W 1H 2R2 M BP  
 Type Shape and performance Dielectric strength Capacity Allowable error Others

CE : Aluminum foil electrolytic	DJ : 6.3V	F : $\pm 1\%$	HS : High stability type
CA : Aluminum solid electrolytic	1A : 10V	G : $\pm 2\%$	BP : Non-polar type
CS : Tantalum electrolytic	1C : 16V	J : $\pm 5\%$	HR : Ripple-resistant type
CQ : Film	1E : 25V	K : $\pm 10\%$	DL : For charge and discharge
CK : Ceramic	1V : 35V	M : $\pm 20\%$	HF : For assuring high frequency
CC : Ceramic	1H : 50V	Z : $\pm 80\%$	U : UL part
CP : Oil	2A : 100V	-20%	C : CSA part
CM : Mica	2B : 125V	P : $\pm 100\%$	W : UL-CSA type
CF : Metallized	2C : 160V	-0%	F : Lead wire forming
CH : Metallized	2D : 200V	C : $\pm 0.25\text{pF}$	
	2E : 250V	D : $\pm 0.5\text{pF}$	
	2H : 500V	= : Others	
	2J : 630V		

## ● Capacity (electrolyte only)

2 2 2  $\Rightarrow$  2200 $\mu\text{F}$   
 Indicates number of zeros after effective number.  
 2-digit effective number.

• Units:  $\mu\text{F}$ .

2 R 2  $\Rightarrow$  2.2 $\mu\text{F}$   
 1-digit effective number.  
 2-digit effective number, decimal point indicated by R.

• Units:  $\mu\text{F}$ .

## ● Capacity (except electrolyte)

2 2 2  $\Rightarrow$  2200pF = 0.0022 $\mu\text{F}$   
 (More than 2) — Indicates number of zeros after effective number.  
 2-digit effective number.

• Units: pF.

2 2 1  $\Rightarrow$  220pF  
 (0 or 1) — Indicates number of zeros after effective number.  
 2-digit effective number.

• Units: pF.

• When the dielectric strength is indicated in AC, "AC" is included after the dielectric strength value.

## PRINTED WIRING BOARD PARTS LIST

**WARNING:**  
Parts marked with this symbol  have critical safety functions. Use ONLY replacement parts recommended by the manufacturer.

**CAUTION:**  
Before returning the unit to the customer, make sure the leakage current check or (2) a line to chassis resistance current exceeds 0.5 milliamps, or if the resistance of the power cord is less than 240 kohms, the unit must be repaired.

**WARNING:**  
DO NOT return the unit to the customer until the problem is corrected.

Symbol  $\Delta$  have critical characteristics.  
Parts recommended by the manufacturer.

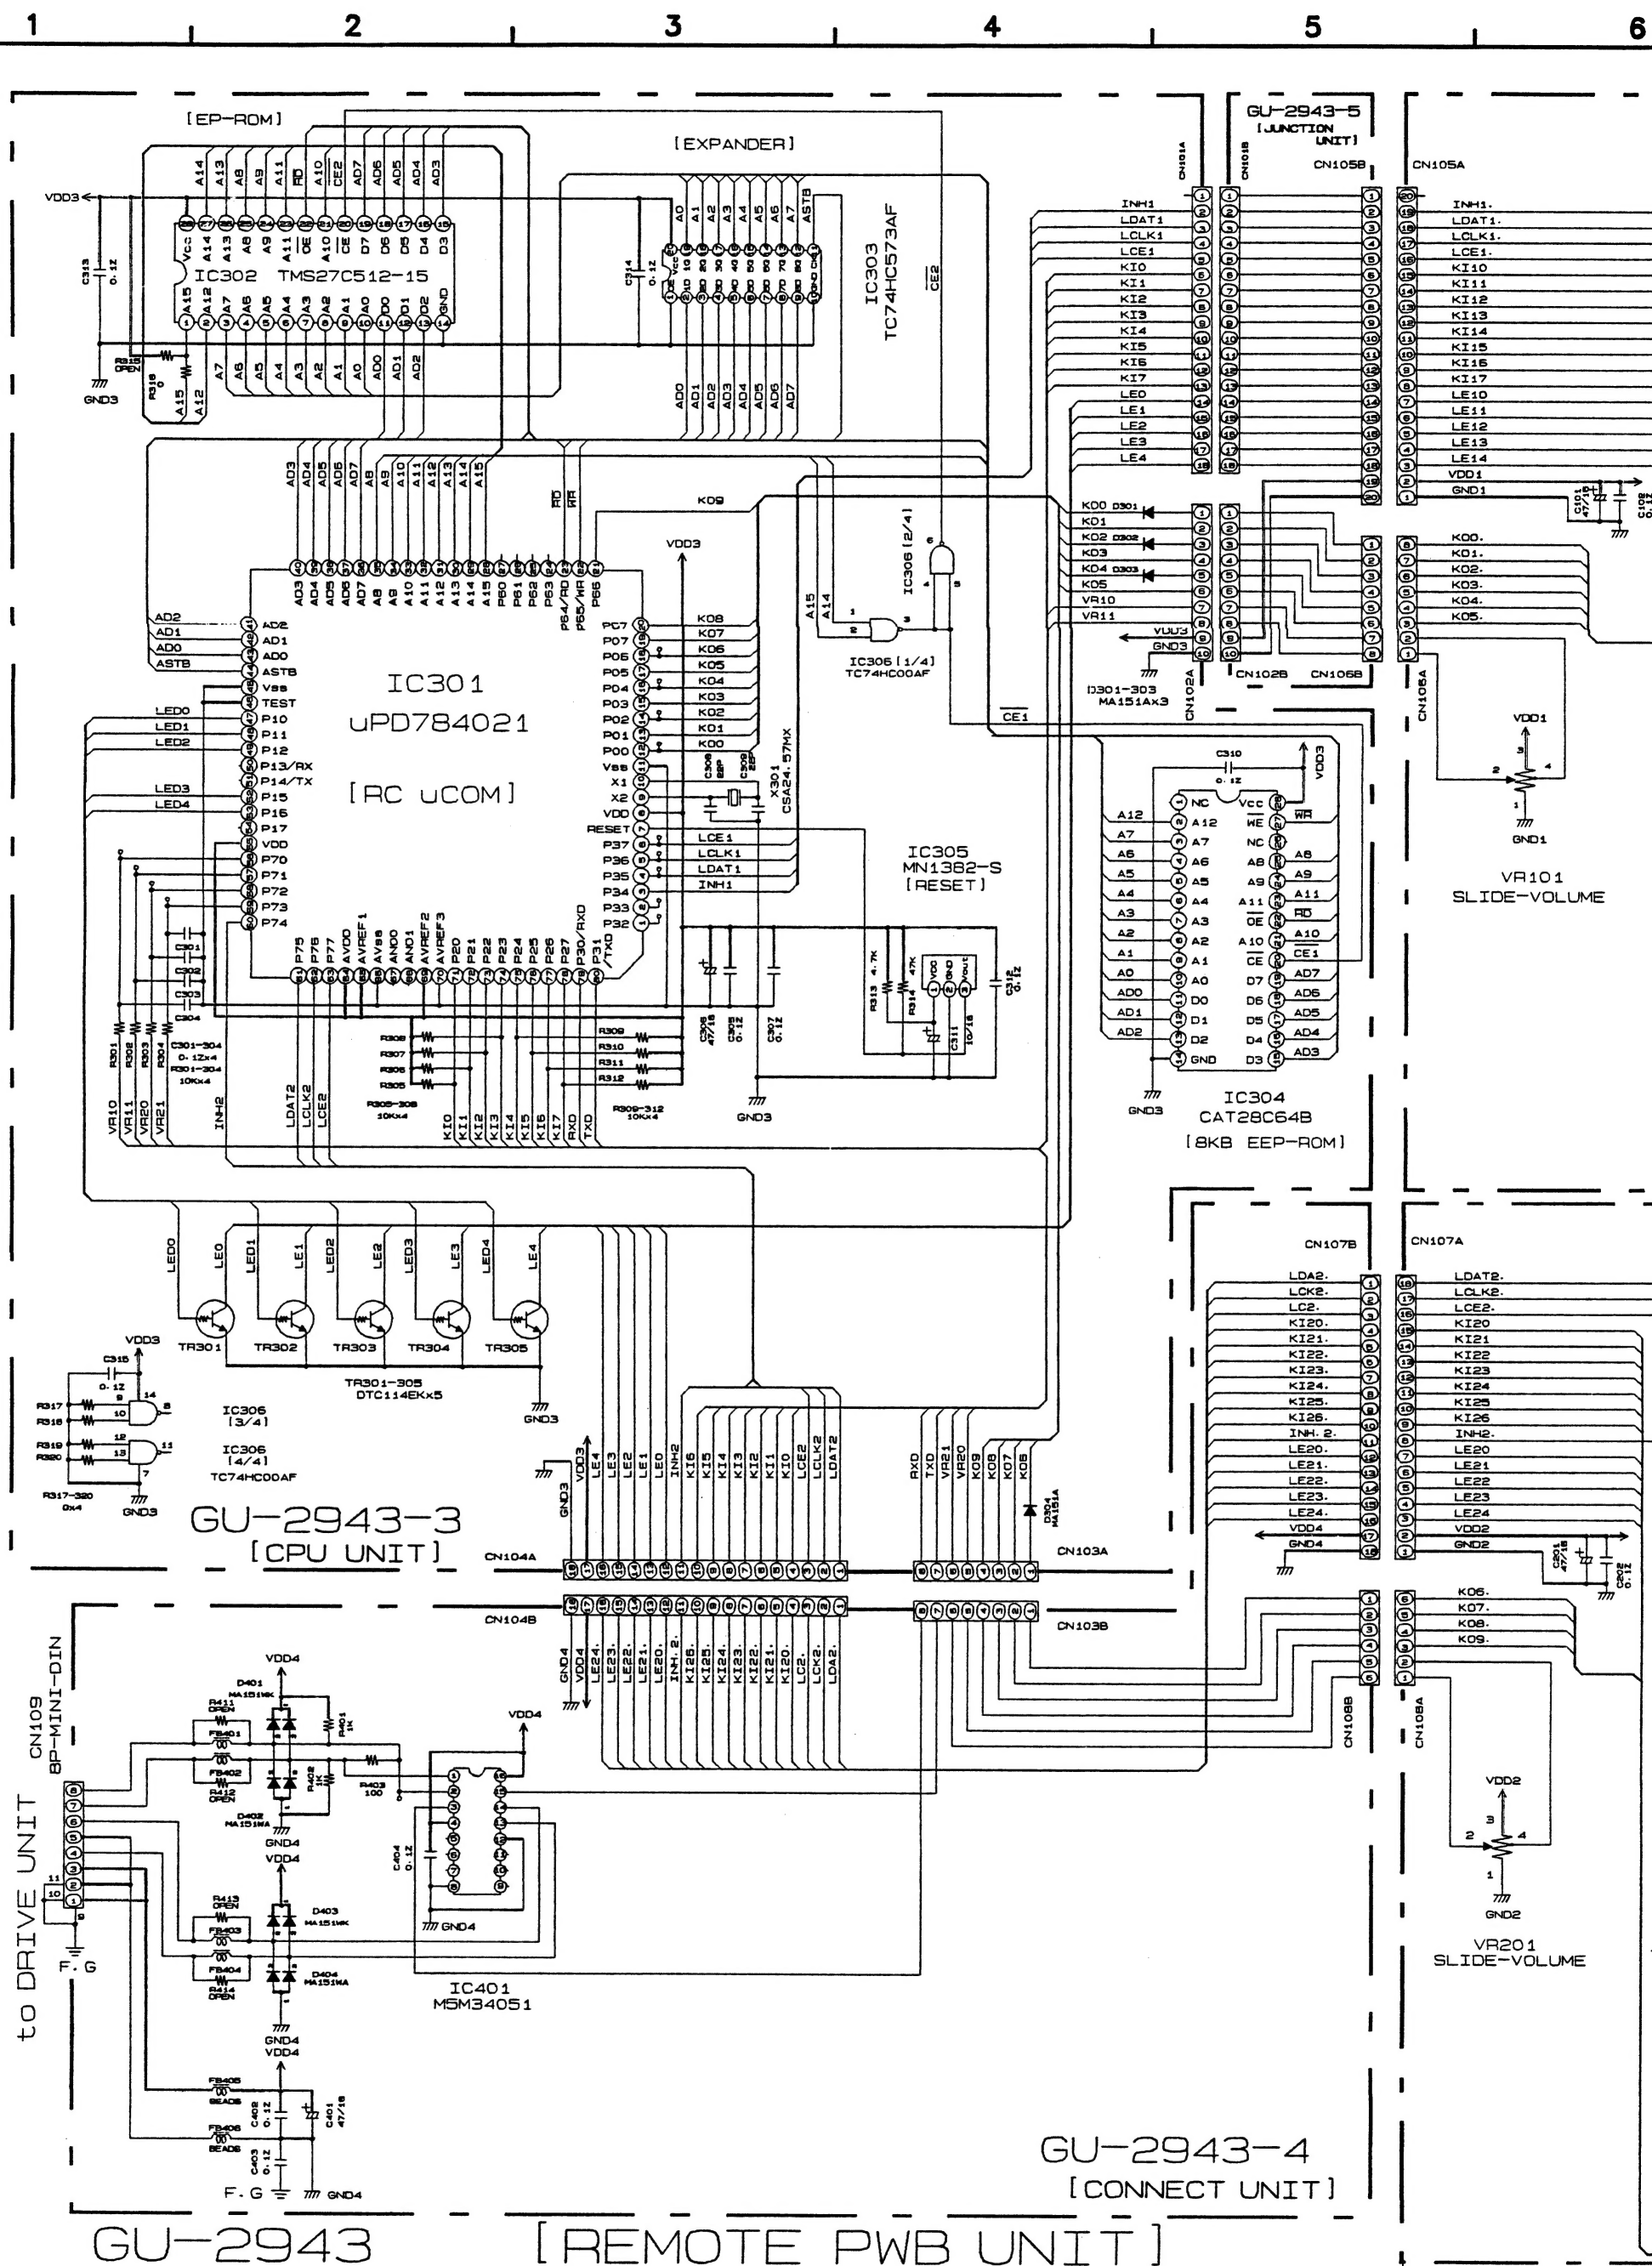

unit to the customer, make sure you make either (1) a  
or (2) a line to chassis resistance check. If the leakage  
milliamps, or if the resistance from chassis to either side  
less than 240 kohms, the unit is defective.

unit to the customer until the problem is located and

#### NOTES

ALL RESISTANCE VALUES IN OHM. K=1,000 OHM, M=1,000,000 OHM  
ALL CAPACITANCE VALUES IN MICRO FARAD. P=MICRO-MICRO FARAD  
EACH VOLTAGE AND CURRENT ARE MEASURED AT NO SIGNAL INPUT  
CONDITION.  
CIRCUIT AND PARTS ARE SUBJECT TO CHANGE WITHOUT PRIOR  
NOTICE.
